

FTP Guide

Note: It is a good idea to put ALL your media files on the FTP server for archiving purposes. This may require broadband access.

1. Use CyberDuck (Mac) or FileZilla (PC) as your FTP Client.
2. Login to ISISMapping with your designated username and password.

Server: <ftp.isismapping.org>
Login: YourDukeNetID@isismapping.org
Password: dukeengager

3. Drop your media files in the “media” folder on the server.
4. The direct link to your file is now <http://www.isismapping.org/media/YOURFILENAME>
